

# CREATING SAFE, SUSTAINABLE PLAY SPACES FOR EVERY AGE AND ABILITY

# Advancing fun play & healthy recreation for every age and all abilities

SpectraTurf delivers beautiful, durable, safe, versatile, and environmentally friendly surfaces for playgrounds, splash pads, fitness trails, jogging or walking paths, in diverse outdoor areas.

# The best team to back up our quality product

With over 100 years of combined experience, SpectraTurf adds value with best-in-class service, project management, and expert sales support. Our estimating department stands out for efficiency, attention to detail, advanced knowledge, and turnaround time. Our experienced, in-house installation team ensures your surface is installed to your exact specifications and design, no matter the size and level of detail.

SpectraTurf is an innovative leader in manufacturing and installing rubberized playground safety surfacing, using both pre-consumer and post-consumer reclaimed material components. Every SpectraTurf system is crafted with recycled materials, diverting millions of pounds of waste from landfills each year. As the first playground surfacing company to incorporate TruCircularity™, we take back old PIP playgrounds and recycle the materials to create new playground base layers.

SpectraTurf is an **Ecore company**. Ecore and its subsidiaries are among the largest producers and users of recycled rubber in the Western Hemisphere.

Creating environmentally friendly surfaces that foster safe play and healthy recreation.

# Diverse applications

SpectraTurf offers a solution for any area where people gather and enjoy safe & clean community spaces.

SpectraTurf surfaces come in a wide range of colors and suit a variety of applications, including schools, parks, daycare centers, fitness facilities, military bases, restaurants, shopping centers, and residential playgrounds. Our surfaces are highly weather-resistant and provide customers with a low-maintenance safety surface.

## Centers of Excellence differentiate

### Sales

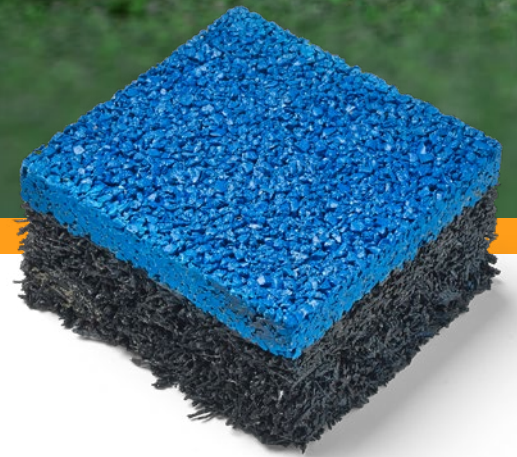

- ◆ Knowledgeable
- ◆ Responsive
- ◆ Thorough

### Estimating

- ◆ Fast turnaround
- ◆ Unparalleled attention to detail
- ◆ Flexible & responsive to customer needs

# Quality materials and installation

SpectraTurf sources the highest quality materials, originating in the U.S.A. Our experienced installers are experts in making poured-in-place playground safety surfaces come alive; from simple designs to unique and detailed ideas from clients. More importantly, our quality installations last. We pride ourselves on mobilizing quickly, building projects right, on time and on budget. We stand behind our work with professional service, and helpful support before, during, and after installation.

## us from the competition

### Project Management

- ◆ Ensures excellent communication with customers and installation teams.

### Installation

- ◆ Highly-trained
- ◆ Direct employees
- ◆ Excellent quality

# Envision a future free from rubber waste

**Circularity is the practice of reclaiming products at the end of life and converting them back into the same products anew, thereby eliminating product waste and keeping materials out of landfill.**

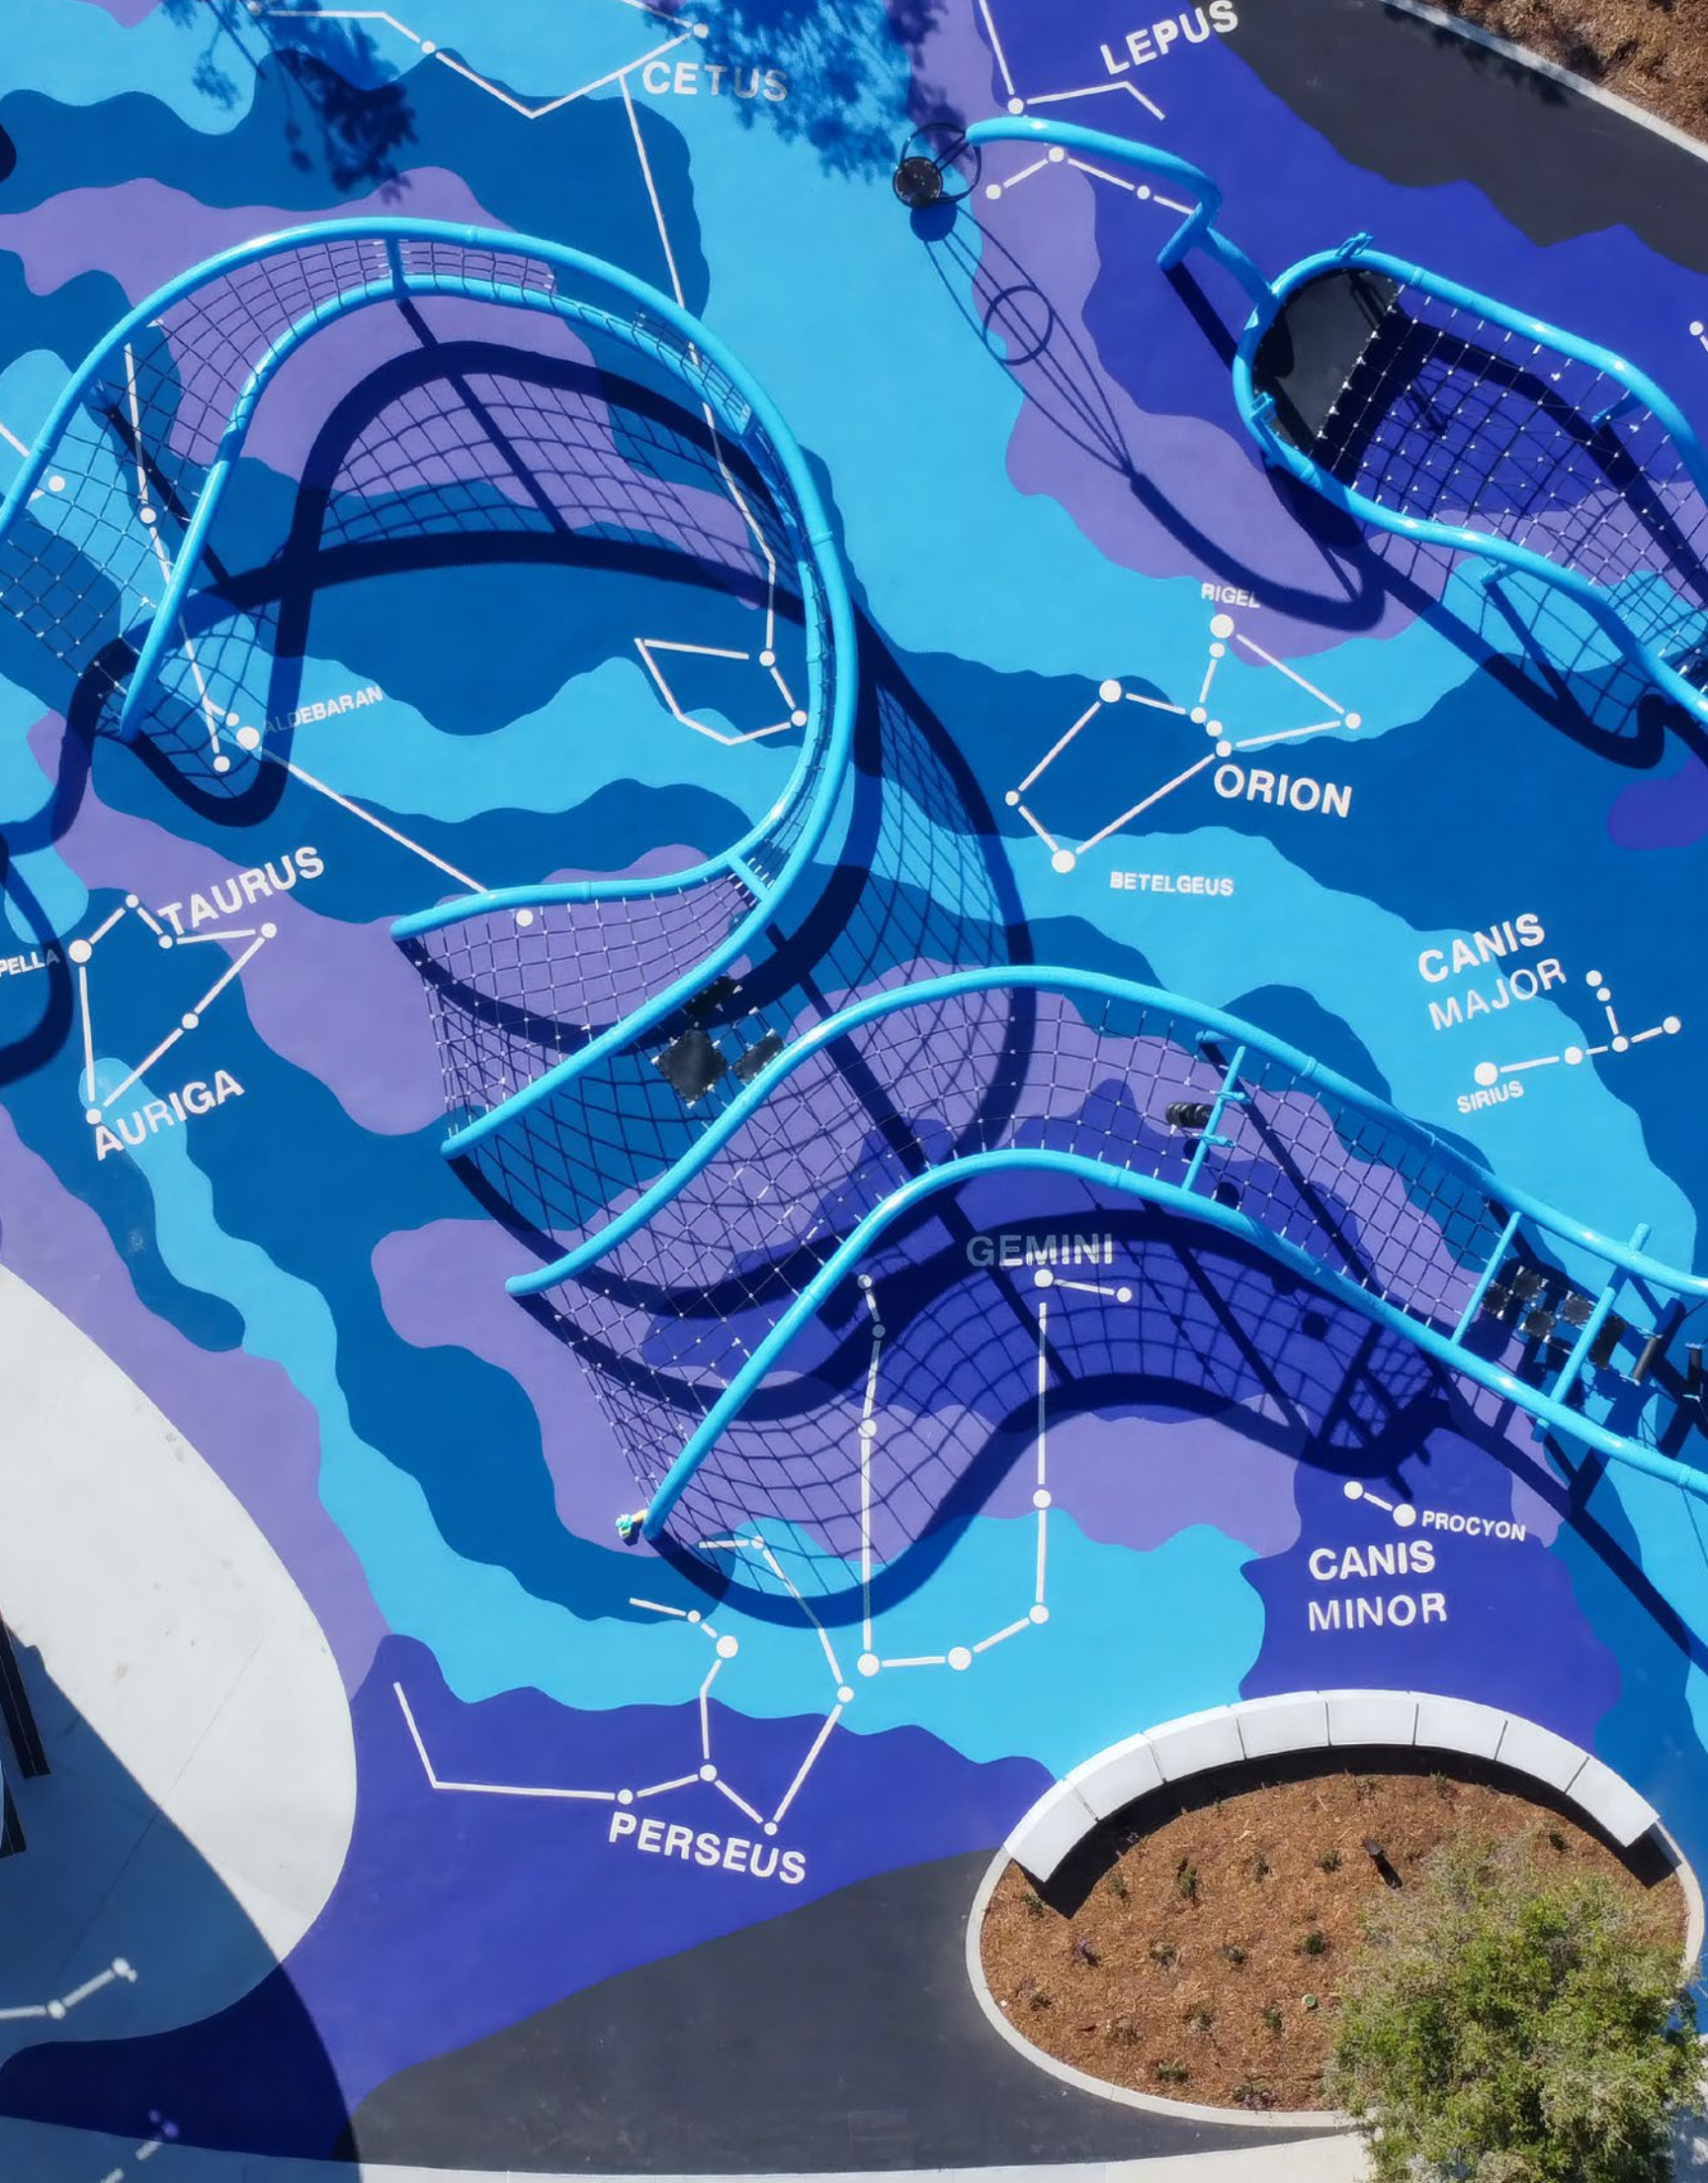

SpectraTurf, with our parent company Ecore International, is a pioneer in circularity. It is our mission to rid the planet of rubber waste. We live by this mission by utilizing end-of-life products as our materials of choice. We now go a step further and are proud owners of TRUcircularity, our take back program, where we reclaim playgrounds at the end of their life and upcycle them into new playgrounds. SpectraTurf's circular model has kept millions of pounds of rubber (and counting!) out of local landfills, reducing this waste burden and contributing to better health and environments in the communities we serve.

In 2020, SpectraTurf was awarded a grant from CalRecycle Department of Resources Recycling and Recovery through their Tire Incentive Grant Program for this innovative process. The program recognizes companies that are finding new ways to upcycle and reduce waste going to landfills

## TRUcircularity in Action.

SpectraTurf takes pride in our commitment to the circular economy by reclaiming old playground surfacing materials, recycling them, and transforming them into new, high-quality safety surfaces. This closed-loop process helps reduce waste and contributes to a more sustainable future for play spaces
